The systematic quantification of the number of people sold online for sex is a critical first step in documenting local commercial sex markets in Massachusetts. By analyzing patterns within these markets, important inferences can be made about sex selling and buying trends. The following results are from a study that tracked online sex selling in target regions of Boston and Worcester from March 1st to May 31st, conducted in collaboration between RIA house, the Imagine Foundation, and William James College.

**2015 Fact Sheet**

- **Total number of ads for commercial sex:** 16,997
- **Average price per hour listed:** $200
- **Estimated revenue in 3-month period:** $7,701,750

- **Top 20 sub-locations mentioned**
